Comprehensive Asset Visibility and Risk Management for OT Environments

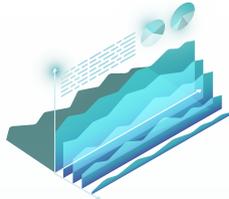

With hundreds to thousands of OT assets in industrial networks, visibility into devices, attack surfaces and protocols is **essential to anticipate risks** before they disrupt operations. InprOTech Guardian is a **native tool for industrial OT environments**. It delivers continuous asset monitoring against established “normal” behavior for precise anomaly and threat detection. Deployable on-prem, hybrid, multisite and multitenant, with flexible licensing and different support levels.

Key Benefits

Visually Clean

Network visualization maps provide simple and single real-time view of OT network health and compliance.

Complete

Full asset inventory visibility, OT communications traceability, threat detection, vulnerability analysis, honeypot integrated, active response...

Simple

Easy to use and understand, from SMBs to enterprises.

Integrability

Broadest OT protocol support, integrated with a wide variety of firewalls, SIEMs...

Flexible

Many features open for customization and integration for any user or SoC.

Core Capabilities

Assets identification

Complete inventory without disruption.

Vulnerabilities management

Prioritized remediation to minimize exposure.

Anomalies detection

Proactive alerts on deviations from baseline through **superior threat detection power**; from heuristics to proprietary machine learning techniques, signatures detection and even honeypots.

Regulatory compliance

Continuous alignment with standards (IEC 62443, NIST, NIS2...).

Seamless SIEM integration

API first.

Malicious traffic blocking

Proactive policy-based OT traffic containment with automatic or supervised blocking to avoid unauthorized activity.

Easy to use intuitive interface

Accessible for experts and non-experts alike.

Affordable

Suitable for all company sizes and segments.

Flexible

DIY or through your MSSP partner.

Agility

Quick Deployment.

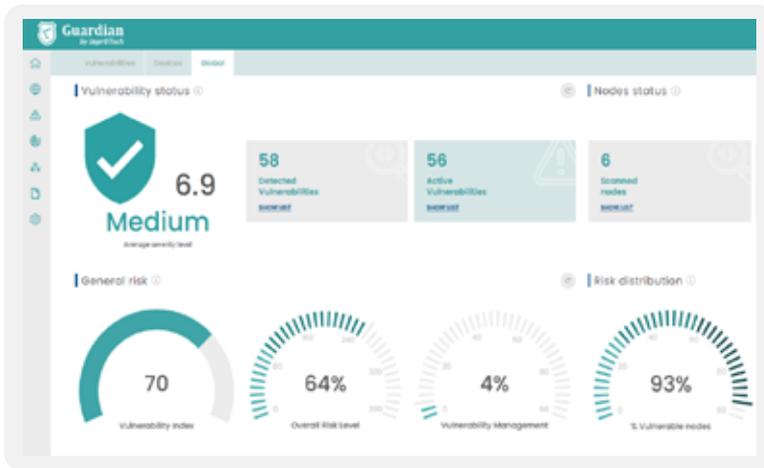

Deployment

Full on-prem, hybrid, multisite and multitenant.

CCN-Certified OT Protection

LINCE-certified OT security aligned with CCN-STIC 105 (CPSTIC) requirements for regulated environments (critical infrastructures).

Production Secured, Risks Neutralised. Sleep Soundly Tonight

Rising industrial cybercrime causes production downtime, data leaks, physical risks, reputational damage, IP theft and regulatory fines. InproTech Guardian provides full visibility and protection.
